

# MULTITUBE HEAT EXCHANGERS

## **HRS C SERIES**

The HRS C Series is a complete stainless steel shell and tube heat exchanger designed for industrial use, based on our K Series but with smaller tubes making the unit more compact.

The product flows through the inner tubes and the service fluid flows through the surrounding shell. The HRS C Series is an ideal heat exchanger for steam-to-water applications such as CIP heating and low viscosity products. Using HRS corrugation technology, heat transfer and efficiency are increased over standard smooth tube heat exchangers. In addition, effects of fouling are minimised.
